Art Unit: 2164

This application contains claims directed to the following patentably distinct species:

Group I: A computer system presenting a user with an ordered set of links responsive to bid amounts, as represented by claims 103-108, 112, 152-153, 156-158, 170-175 and 177.

Group II: A computer system presenting a user with an ordered set of links ordered by both bid amount and at least one additional criteria or additional variables, as represented by claims 154-155, 169, 176 and 178-196.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Any inquiry concerning this communication should be directed to Sam Rimell at telephone number (571) 272-4084.
